

The background is a light cream color with a repeating pattern of stylized, colorful dinosaurs and plants. The dinosaurs include a green long-necked sauropod, a purple triceratops, an orange T-Rex, a red Stegosaurus, a blue long-necked sauropod, and a pink pterosaur. There are also green leaves and blue eggs scattered throughout. A white rectangular box with a thin grey border is centered on the page.

Triassic Park Spring Boot API

Hello!

My name is Jools Arts, and I'm here to walk you through a demonstration of my paleontology themed Spring Boot API

I hope you enjoy the presentation!

You can find me at jools.arts@gmail.com

The background is a dark blue field filled with various colorful, cartoon-style illustrations of dinosaurs and prehistoric plants. In the top left, there's a pink Pterosaur. To its right is a green long-necked dinosaur (Brachiosaurus). Further right is a purple Triceratops. In the top right corner, there's an orange T-Rex and a small white egg. On the left side, there's a red Stegosaurus. In the bottom left, there's an orange T-Rex and a green long-necked dinosaur. In the bottom center, there's a purple Triceratops. In the bottom right, there's an orange T-Rex and a pink Pterosaur. Various green plants and leaves are scattered throughout the background.

2. Risk Assessment

- Here's my completed risk assessment!

[illegible]

Risk Assessment						
	Description	Evaluation	Likelihood	Impact Level	Responsibility	Response
1.	Make an error when committing changes to the application via the Git Bash terminal.	Could result in an incorrect version of the application being pushed up to the GitHub repository.	High	Medium	Myself	I would either, have to recreate the files from scratch, or I would have to access a backup from which I would be able to restore the application to its previous state, prior to the changes being committed and pushed up to the relevant GitHub repository.
						First, I would perform a test commit that would include adding, committing, and pushing a sample .txt file up to the GitHub repository to ensure I was performing all of the necessary steps in the correct order. Once I had established the method of committing changes was working as expected, I would create a working backup of my application and store the files either, within a cloud storage solution, or via another drive locally which would ensure the security of the application, even if an error were to occur during the process of pushing the changes to GitHub.

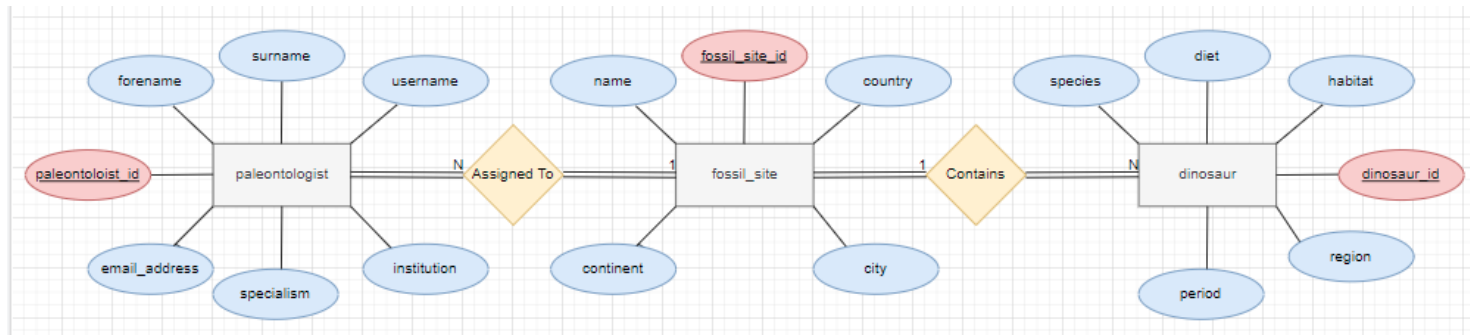

3	The servers that support the GitHub platform could experience technical difficulties and go down for a period of time.	Could result in any changes that I make to my Sprint Boot application/MySQL database being unable to be uploaded to my GitHub repository, resulting in the only version of my Sprint Boot API that is able to be pulled is that of an incomplete nature.	Low	High	GitHub/ GitHub's cloud provider	I would have to ensure all of the changes I had made to my application up until that point had been saved locally to my machine or alternatively, to an alternative cloud service provider. From there, if another developer on my team wanted to access the work I had completed up until that point, they would either have to receive the files via email which would not be very secure, or I would have to transfer the relevant files to a drive and physically deliver them to him/her.	Although my ability to control the events that directly affect GitHub are rather limited, I could make efforts to ensure all of my files are updated, and backed up locally. By doing this, I could possibly upload them to an alternative open source development repository. Although, this response would have its own risks associated with it. For example, the relative security of the alternative repository service may not have been fully verified to the extent that GitHub has. Therefore, the best course of action may be to exchange files locally, although this method of addressing the issue may not be suitable for large companies that operate at a national or even international level.

The background is a dark blue field filled with various colorful, cartoon-style dinosaurs and plants. In the top left, there's a pink pterosaur. Next to it is a green long-necked dinosaur. To the right is a purple Triceratops. Further right is an orange T-Rex. In the top right corner, there's a red Stegosaurus and a light blue egg. On the left side, there's a red Stegosaurus. In the bottom left, there's an orange T-Rex and a green long-necked dinosaur. In the bottom center, there's a purple Triceratops. In the bottom right, there's an orange T-Rex and a pink pterosaur. Various green plants and leaves are scattered throughout the background.

3. Diagrams

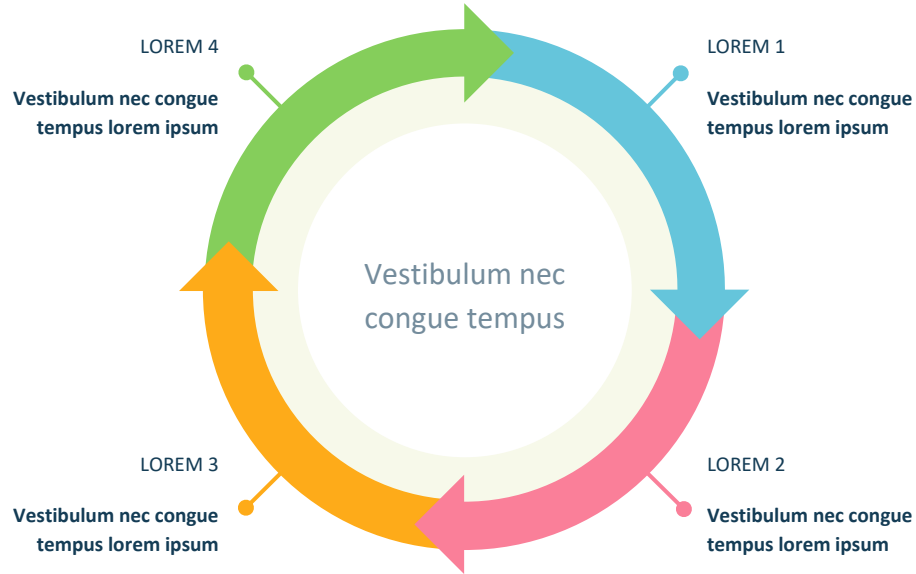

A picture is worth a thousand words

A complex idea can be conveyed with just a single still image, namely making it possible to absorb large amounts of data quickly.

Want big impact?
Use big image.

Use diagrams to explain your ideas

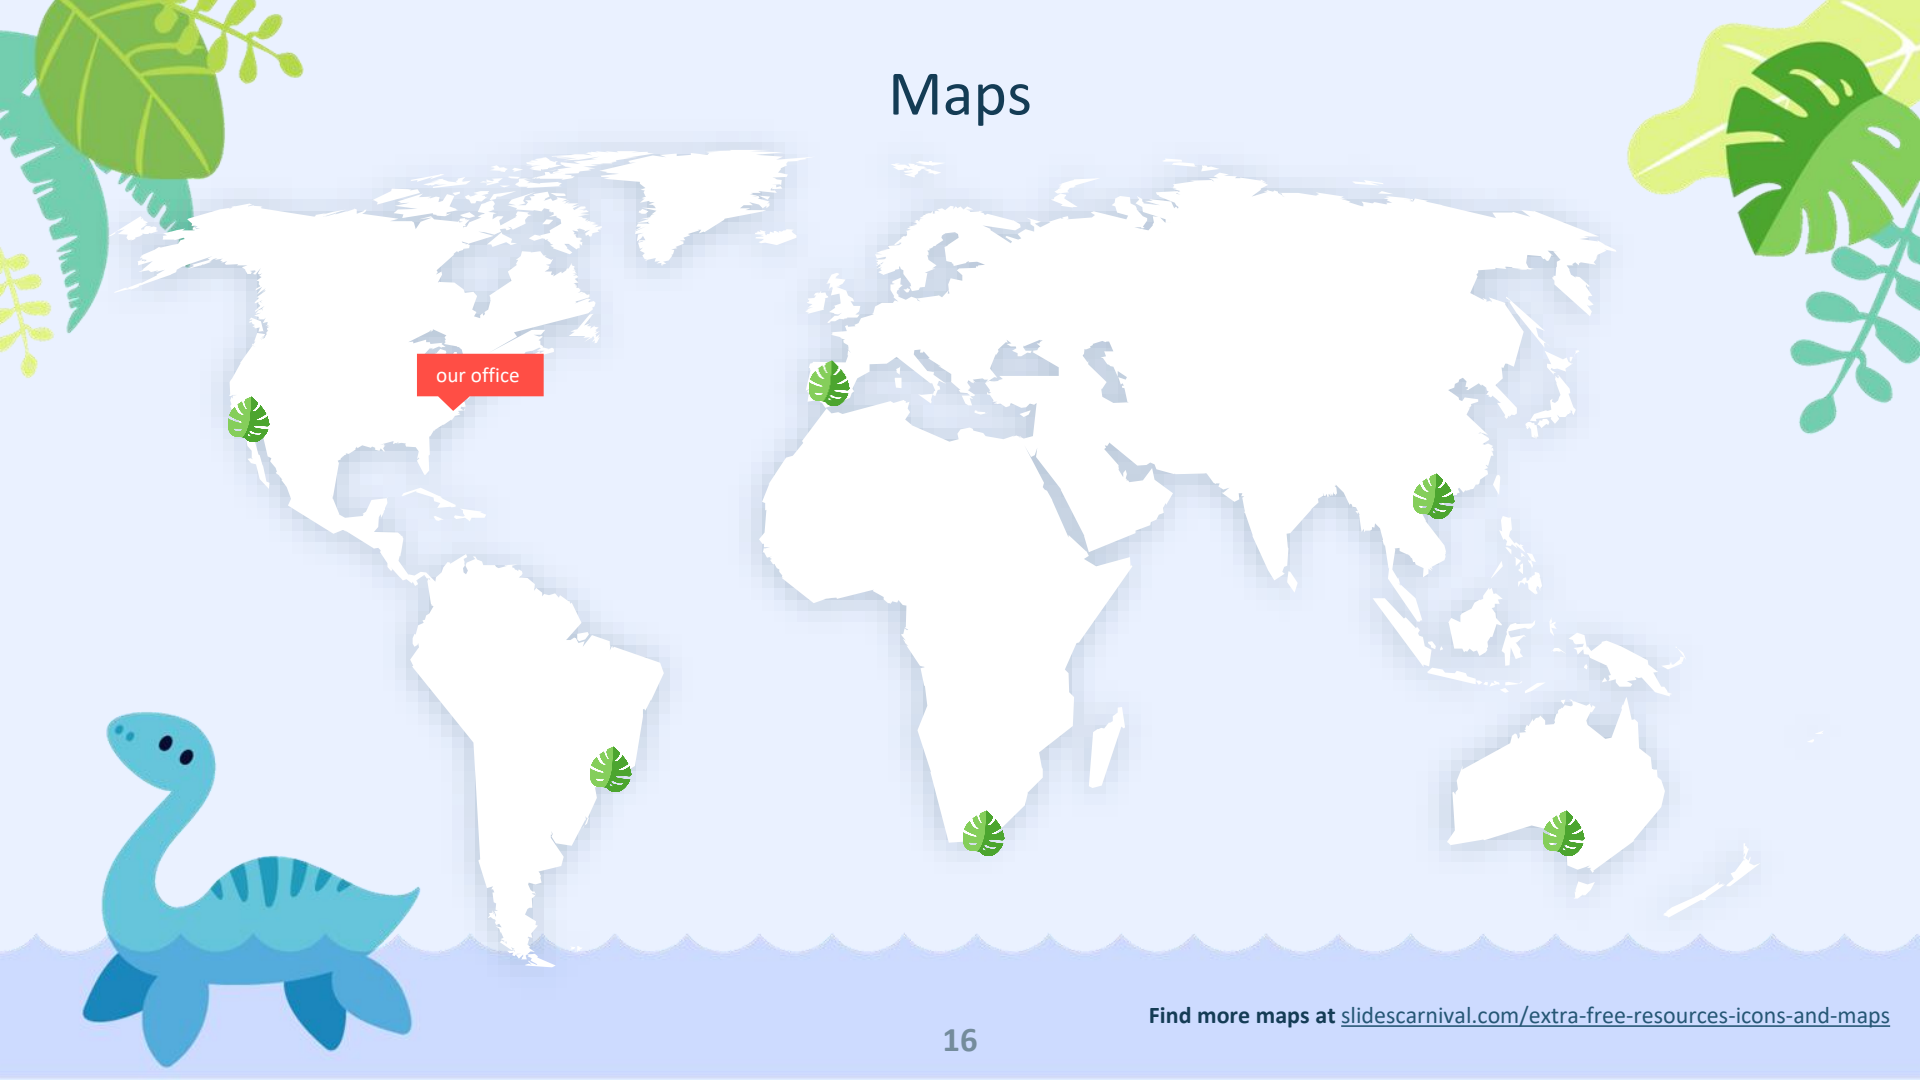

And tables to compare data

	A	B	C
Yellow	10	20	7
Blue	30	15	10
Orange	5	24	16

Maps

89,526,124

Whoa! That's a big number, aren't you proud?

89,526,124\$

That's a lot of money

185,244 users

And a lot of users

100%

Total success!

Vestibulum congue tempus

Lorem ipsum dolor sit amet, consectetur adipiscing elit, sed do eiusmod tempor. Donec facilisis lacus eget mauris.

Let's review some concepts

Yellow

Is the color of gold, butter and ripe lemons. In the spectrum of visible light, yellow is found between green and orange.

Blue

Is the colour of the clear sky and the deep sea. It is located between violet and green on the optical spectrum.

Red

Is the color of blood, and because of this it has historically been associated with sacrifice, danger and courage.

SlidesCarnival icons are editable shapes.

This means that you can:

- Resize them without losing quality.
- Change fill color and opacity.
- Change line color, width and style.

Isn't that nice? :)

Examples:

Find more icons at slidescarnival.com/extra-free-resources-icons-and-maps

Diagrams and infographics

You can also use any emoji as an icon!

And of course it resizes without losing quality.
